Subject Re: Nease Chemical Site, Salem, Ohio - PDI Work, Wetland
Delineation 

Rainer,

After consulting with Sheila, I approve the Davey Resources Group to conduct the wetland delineation for the OU 2 PDI work. In accordance with paragraph 31.c of the Settlement Agreement, I also formally authorize this work to proceed in advance of the approval of the final PDI Work Plan.

This method of requesting approval of additional contractors will be fine.

Mary

Subject Nease Chemical Site, Salem, Ohio - PID Work, Wetland
Delineation

Mary and Sheila:

According to the draft PDI Workplan, ROC needs to conduct a wetland delineation incl. ORAM and survey. The parties agreed to start this work prior to the final approval of the workplan. ROC/Golder talked with several contractor and have decided to use the Davey Resources Group out Kent, Ohio, to perform this work.

With this email, ROC is requesting approval from US EPA to use Davey Resources as contractor for the wetland work. If you have questions, please let me know. The webpage for Davey Resources can be found under the following address: www.davey.com.

Please let me also know, if this form of requesting approval may be used for the other future contractors.
